

with anti-blue ray defense and deep moisturization. This all-in-one formula not only safeguards but also primes the skin, leaving it with a radiant, even-toned finish.

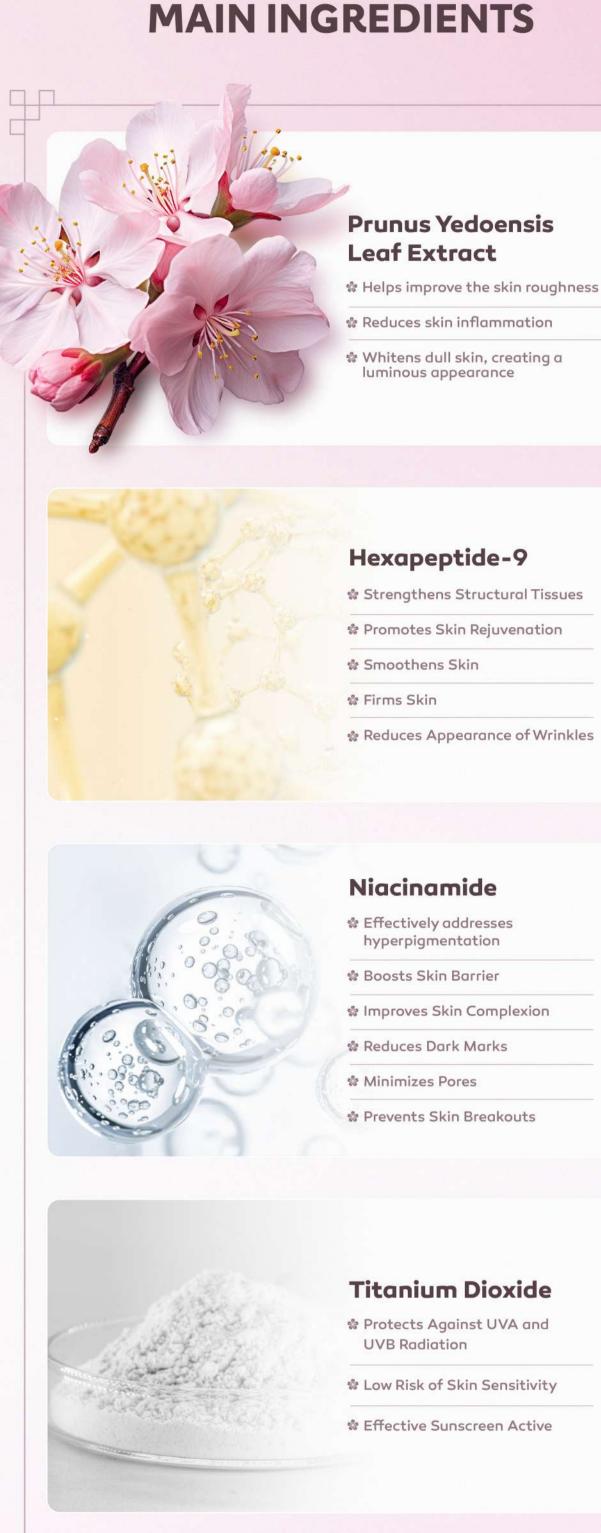

INTRODUCTION

Sakura Sunscreen offers a multifaceted approach to skincare, combining SPF protection

Prunus Yedoensis Leaf Extract acts as the main ingredient to improve skin roughness and whiten the dull skin. Titanium Dioxide helps protect the skin from short-wave UVA and UVB radiation, while Iron Oxide helps protect the skin against the HEV light. Niacinamide, a potent form of Vitamin B3, targets hyperpigmentation, refines skin

texture and shrinks pores. Hexapeptide-9 is a collagen peptide that works to diminish fine lines for a smoother complexion.

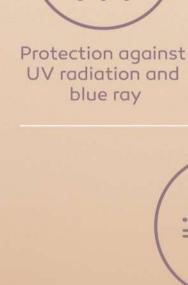

Skin Tone Up

MAIN FUNCTION

Iron Oxide

Protects the skin from HEV light

Non-toxic and non-allergenic, making it ideal for sensitive skin

Step 1-

on the cheeks.

Step 2

Begin by applying foundation
